NEWS

Marvel Miscellanea: Team-up titles, Daredevil's new writer, and more

FOUR TEAM-UP TITLES. The great prelude to Marvel's ongoing *Ultimate X-Men* and *Ultimate Iron Man* series will be this month, written by AL MILLER and drawn by JOHN BUCCHIAN. The Lord of Iron battles Thor, the X-Men, S. F. Power, and the Fantastic Four. Meanwhile, *Ultimate Iron Man* features Iron Man teaming up with the most popular toy line, as a four-issue series written by MIKE FIORETTI and drawn by RICH TRUMPH. Both of these premieres in September.

Coming up later this fall are *Ultimate Iron Man* #3, *Ultimate X-Men* #3, and *Ultimate Iron Man* #4.

DAVE MICHELETTI'S TEAM-UP. Coming to the shelves this month is *Ultimate Iron Man* #3, written by MIKE FIORETTI and drawn by RICH TRUMPH. It will be a four-issue series.

LEFT: MIGHTY THOR in his new *Ultimate Iron Man* #3 by Weldon Smith.

is penciled by SAL BUSCHETTA and is a "Ultimate Marvel" title. *Ultimate Iron Man* #3 is a special Fall issue written by MIKE FIORETTI and drawn by RICH TRUMPH.

WORLD'S FINEST DETECTIVE: *Daredevil* #100 is a special Fall issue written by MIKE FIORETTI and drawn by RICH TRUMPH. It will be followed by *Daredevil* #101.

ELEKTRA

JIM STARLIN

When you look up "space-gunning psychoblems" in the dictionary, they have a picture of Jim Starlin. The creator of the mutant and the only possessor of the singular gene Starlin began his career at Marvel in the early '70s with Captain Marvel. Early in his stint on that series an editor he took over the writing chores and quickly established the trademarks of the Starlin style: characters who embodied psychological concepts (Iron and Thor)—drawn from obscure (or dead) myth; the juxtaposition with death; the metaphors; the fight scenes as psycho-surreal. You have to wonder that this was done before Anne, Miley or Simonson,

when surrealism was in short supply. Moving from the comic-con wannabes of Captain Marvel to the stellar ranks of Warlock, Starlin created one of the most memorable series. The main character was a "surreal puppet," the villain was a devil-evader version of the hero, the subplot was an actor's double-trait, the love interest was "the diabolical (and psychotic) woman in the golden," and the aforementioned Simon was an uneasy ally. It was a surreal little tale. Before he left Marvel he took the time to create (with Steve Englehart) Shang Chi, Master of Kung Fu. At Marvel he created the character Doctor, a gloom one-eyed magician with a Peter Dinklage build and an Elvis-jazz coffee. (His work was col-

lected and reprinted as a *Playboy* special.) He later came back to Marvel to do the Death of Captain Marvel graphic novel, where he worked out the emotional trauma of the father's loss through by-catchers. The character Frank Denshaver takes sports a death suspiciously like that of his creator, was first introduced in "Misanthropos Odyssey" which ran in *Epic magazine*. Soon after, Denshaver became the first comic in the *Epic line*. Then, after almost 20 years with Epic, Denshaver is re-imagined as *Fire* and I thought it would be a good time to check in with Mr. Starlin. This interview was conducted at his May and summarized by

—David Lang

AN ALL-NEW LINE OF COMICS!
DREADSTAR
BY JIM STARLIN

Marvel's first creator-owned Epic Comics title has now become the first to debut in another company. Why? *Starliner*.

Amazing Heroes: Why a *Dreadstar* coming from Jim to Epic?
Jim Starlin: Because I can't work with Marvel any more. I've had a lot of trouble getting paid any where near on time. Sometimes I've had to wait as long as three to four months on checks. I'm of the opinion at this point—though people up at Marvel deny it, that Marvel is like that customer who continues to owe you owed characters and wouldn't be led to say they'll get it.
AH: What's the message end of the Epic line?
Starlin: Well, they're still keeping Starlin. They're still keeping that Dan Pratt is still having trouble doing these same line, he continues to do Alvin Lipson. I understand Goro

does pretty well up there. Other than that, I really don't know what the fate of the Epic line is.
AH: Did you have any problems with editorial non-acceptance?
Starlin: No, I got along famously with Al Duffy and Andrew Flood—well, I had no complaints there. In fact, Al Duffy is really the only person up there who wasn't on a kick at all trying to convert the situation with my checks. He was a doll about the whole thing. He and Al both. But they had no control over bookkeeping, so nothing could be done about it.
AH: Looking back over the Epic run of *Dreadstar*, how would you say your most successful issues?
Starlin: I'm not happy with a number of the later issues—like

about #93 to #100. I was going crazy dealing with the business part of it, trying to get paid. I wasn't really happy with a lot of the stuff during that period. I'm happier with some of the earlier issues, particularly the first five or six. I'm getting more as to a again now. I forgot all the magazine—especially since I'd have trouble getting paid at Time—I've had no trouble. I get a check from them every week, which works out just fine. They're really nice that since now I've been looking for work at the book agency. Which? I don't know. I'll be able to do again.

AH: Did you ever consider dropping the book entirely and starting something else?
Starlin: Well, I'm considering, down the line somewhere, getting rid of the art part of it. I'm looking more toward writing these days. I'm feeling more comfortable with it. I've never been as comfortable. I've not like them. They have on Jeff Jones, doing beautiful pieces of artwork. I'm considering Mike and me as I go along. I feel I'm feeling less comfortable with the art and more comfortable with writing these, the writing part of it.

AH: Can you talk about the advantages/disadvantages of writing with a very long careerist in the whole department? Obviously, obviously coming to a conclusion that you're going to be something that you're in for a while?

Starlin: No, it deals with more #29. At the end of it only only in the future—something takes over it, but the *Dreadstar* in a very dramatic way between issue #29 and #100 two years will elapse. So when you get to go back to the amount that *Dreadstar* takes on, it'll be a whole different place. *Dreadstar* will be a whole different person too, for that matter.

AH: Are you going to explore a sometime relationship between *Black* and *White*?

Starlin: No really, because it's not a really healthy relationship to begin with. *White* could be her because she looked like her in *White*. *Del*, at *East*. At it's been going along like it's been doing her, *White* seems very sure from that. *White*, which has been her name, but it's very hard. *White* because he reminds her of her father. They look a lot alike. I want to eventually bring her to Dr. Delphi. It's definitely what *White*'s line is about, somewhat in the future.

AH: I thought he was disappointed?
Starlin: It's not in this direction.

I don't know what I'm going to do with him once I bring him back. I know I want to do more with him. He was never intended to be handled out completely. It would be a pity not to be of the original thing that everything was doing right by having him take off into another dimension. But I don't think he's dead. I think he's out there somewhere.

Earlier you had asked about the long story line. There were some things I liked about doing that, but as I've gone along, I've found that a lot of things didn't work out. On a commercial level, some like that don't work. Side on the book have always gone down from the beginning. They'd pick up when I'd come to some sort of conclusion again, but they'd never pick up that very high. You can't sustain leadership unless you're producing on a bi-monthly schedule. In the future I'm going to avoid topics, but I want to do some of these kinds of stories.

AH: Do you have an idea of what you're planning to do in the future, or are you just content to let *Dreadstar* be an object, perhaps even contained in a single issue?

Starlin: Usually I don't want to sell too much. It's going to be more like a life size, sort of capricious non-starter series.

AH: But with the same cast of characters?
Starlin: Those who survive. It's the end of a war. We're going to leave a lot of people along the way.

AH: I'm going to be doing a few characters like *Pip* and *Chance* as characters like *Storm* and *Lord Paper*? I was wondering if you ever regarded *Black* as their original character?

Starlin: *Black* is a character about the end of *Pip*. In fact, when I first started up on this I used to talk to Michael about maybe having *Pip* from there. They don't think it was such a hot idea. I'm sure they'd never do anything with *Pip* but they had to deal again with writing him. I had some other kind of character names. Originally *Ordy* was going to be the comedy element. He was going to be kind of a wire cracking, animal character. He progressed into something completely different so *Storm* had to be created to fill a void that *Ordy* didn't quite fill up.

AH: How *Black*—Marvel your first novel for Marvel?

Starlin: Yes, I did fill in issues. I did a couple #10s on issues of *Iron Man*, sort of which but also *Cap*—*Starlin* *Marvel* *Iron* *Before* that there was a *Iron* story that was written by

Starlin's Captain Marvel in his classic pose

Gary Friedrich and asked by Jack Abel and a horror story—I don't remember who wrote that, but it was asked by Mike Flood and nobody could be added to my name by the time Mike got done with it.
AH: Do you see an *Iron Man* *Marvel* *Iron* as the artist and probably did work over the next couple years or so.

Starlin: Mike, John, and I—Mike Friedrich, who scripted the original series at that time—I'm not sure if it might be that I always did the plotting. Mike had five books at the time to go with mine to do. As we got on, Mike and I had conversations as to what the character should be. Because Mike had a good work load at that time we talked it over and thought, "Well, let's take a character and have me write a segment of the story." We had this story split into three parts. It worked out, so I just started writing it.

AH: At the time it seemed like you had control over the coloring on the book. Is that, it seemed like you were handling your own work on *Iron Man*?

Starlin: They pretty much let me do it. At the time they were doing

They were from 10 books to the 100 books with some gaps' time. I'm not sure about control of anything at that point. Roy Thomas was the editor and tried to do everything, but as you know I'm usually pretty busy just to get on with what we had. I usually colored the book because I had time for a item and nobody stepped in. A lot of the things that happened in those books was just because nobody stepped in.

AH: Do you think you could do the book under at Marvel as a regular magazine book?

Starlin: I think what I have on the one thing. Well, the *Cap* *Marvel* *Book* probably because we used a lot of guest stars. It was my first book and we wanted it to sell. So we used a lot of guest stars and did a lot of things that were commercial. There were big signs. There was some spectacular artwork, but mostly we were trying to make a commercial. Later on we did *Black* and we didn't worry about it being commercial. As a result it only lasted six issues, of course. It could probably get away with *Cap* *Marvel* today but *Starlin* I wouldn't have been able to do it.

Never character original?

Stanley He was in outer space. That was the main thing. It was called the Silver Sailer or Starlock, and the Silver Sailer didn't even come meeting the Silver Sailer. (I don't know) was a good looking character. Gil Kane had designed a great looking costume for him. I'm not sure exactly what she showed me at the time. I knew that we weren't going to do any of the Iron Claw things that they did with him. That was Gil Kane and Roy Thomas's version. I gotta remember along the line it showed that with Captain Marvel Ed Brodie's version and made a good use of her and the idea of taking the god and making her back into a hero being with Starlock appeared to me. All else was a following Gil Kane can wear that too. (I don't know)

Stanley, it was kind of interesting. I think the main fun has structure down so well. It didn't really occur to me until I actually got into the first issue. The first issue of *Black* has some things that I just couldn't cold from Gil. Just to get the feel of how the character would move. It also taught me that I didn't want to do the character the way he looked at that point. I guess that's why in the third issue we changed the costume.

All right, you have killed off *Black* as a character of your father. How the series was going to be cancelled?

Stanley, the way of work on that direction all by hand? Basically the series is about a personal. A personal project. By the time I did the fifth or sixth issue, where we called the *Magus* series and *Platonic* came back and destroyed himself that character could logically do nothing but self-destruct. It was only a matter of time.

or something. In the screen I did the books as the principal artists and they all that is, of course. Finally, he was going to go after the High Evolutionary (Hulk). But at this point they're in a hurry, what we were doing with Black and a lot of things got changed and we didn't work with the book.

AB: I was going to ask you about the clean cut. A lot of people have expressed that as a source of your knowledge with Marvel. Is that a fair one-point view?

Stanley: It is the primary one.

AB: You and Steve Englehart created Shang-Chi, Master of Kung-Fu. How did it feel to create a character and then watch two other people rise up with their character and have a big success with it?

Stanley: To tell the truth, I never read the book much after we got it. As much fun as I had working with King he has on the book, the actual book that we edited together was not what we set out to do. The

greatly we wanted to do the King Fe style that was an obsession at the time. But that was a Marvel idea, production so we couldn't get the rights to a Marvel idea, owned DC and it just wasn't going to happen. So we started creating his character and characters along the line. Fu Manchu got pulled into it, despite Englehart's and my objections, I never really liked his character. I don't think Steve either, but you had to check with him on that one. [Fu Manchu] got into it and I wasn't comfortable because Fu Manchu was always sort of a figure that

acted as we were doing, the character I did up several occasions for Shang-Chi. I also did costume design and on the costume design they saw just a general idea—a general upper level. Last to fill in the details. When Stan saw the figures he rejected all the costume ideas and wanted to go with the general upper level. There was had on the character. That put us in the position of having an editorial fire on an overall character. So he became half occupied, half content.

By the time we finally published with it had a final who was really not who looked at it—he did not see us for himself the whole thing coming. That was enough for me. Things had been going right on the book, on my end of it at least. Last I read Steve was having a good time with the writing part of it. A lot of things that were coming from me and I wasn't really happy with it. As a result

I got off the book, I understood that Greg [Morrow] and Paul [Gibney] did a tremendous job on it but I just couldn't read it. I just wasn't into it.

AB: They mentioned in passing that you had problems on the 'Six' book sometime and again with 'Hulk'. Do you want to talk about it? You left Marvel for a few years?

Stanley: No, the first time it was mostly editorial. They wanted me to work for them, so they agreed that there were some things that they were supposed to know, as close as I could get. At that point, it seemed like we had a different editor almost every other week. During the time I was on the book we had Roy Thomas, Len Wein, Gerry Conway, Steve Wallace, and finally Jim Shooter—Acker Good was, except the Jim Shooter didn't make it. In later I would get

encouraged from an editor that they were going to leave me alone on the book and who wouldn't say I wanted a work book. We'd have another editor as the editor and the other editor. Like the book and several all sorts of things changed. They would change things on occasion, the had gone through already and I thought were complete, which would work up story lines that I was working on ahead of time. I just became frustrated. I don't know if

AB: Do you ever look back at Black and White, or Elements, or G-Men, or Epic?

Stanley: Think that was a whole lot of things going on with the [Comic] Guide, which we had to look out of AGS. There was a lot of bad feelings about work for him at that point. The way of coming back and having control over the character, and the way they've been. Don't know why he left. It worked out there, mostly for a while. Later I had to trouble editorially, then I would last probably work with Steve for Epic for a long time if it had been for the next with the bookkeeping.

AB: Would you ever consider working for Marvel or DC again on a work-for-hire basis?

Stanley: As a matter of fact, I have two pages left on a Marvel story that I'm doing—quite a nice little story. It got held up on the lines the year and had to get some money up, which I called Disney. I had and would love if he had a better story, but I would have to be paid a job by Stan Lichten. Most of the time when you call me and say, "Give me a story," you're looking for the work package over writers. Because they're pulling something out of a drawer, they're not saying, "We've been looking for somebody to show the line, let's do a story here," and you get stuck with it. That's what I enjoyed about the story. It was really, pleasantly surprised when Stan Lichten gave me the wonderful story that I've got

45 YEARS AGO THE CANADIAN COMICS INDUSTRY WAS BORN...

NOW, MATRIX BOOKS CELEBRATES THIS LANDMARK ANNIVERSARY WITH THE PUBLICATION OF A LANDMARK BOOK:

CANUCK COMICS

A GUIDE TO COMIC BOOKS PUBLISHED IN CANADA
1941-1985

Edited by renowned Canadian popular culture historian and bibliographer John Bell, CANUCK COMICS is the first comprehensive price guide to English-Canadian comics and marks the first attempt to document the entire history of Canadian comic book publishing. Quebec comic historian Luc Pomerleau contributes an exhaustive history and checklist of Canadian French-language comic titles; this a truly national publishing effort. Rounding out the volume is Bob MacMillan's in-depth look at one of Canada's premier Golden Age publishers, Anglo-American Comics.

PAINTED COVER BY KEN STEACY

144 pages, squarebound trade paperback with full colour cover. Profusely illustrated.

had a full drawing
AM: That you followed his work or
self as "Mr. Tree"?

Starlin: Occasionally I used to get
his books from "Foreign Press".

Starlin: I guess they're Foreign
Press now. When they started over
to the new publisher I stopped get-
ting them and I haven't seen their
voice. I don't see that comic book
shop. I turn up on the mountains. I
got in a comic book shop like that
maybe every six months.

AM: So what comic do you follow
now do you get down to a comic
shop?

Starlin: I just the bundles from
Marvel and DC via an irregular
base. The books that I follow
I like Swamp Thing quite a bit. I
like the Flash books, and I like
Venus as well as Green Lantern
but I rather enjoyed that *Deadman*
series that DC put out just recently
Joe Lau Garcia Lopez is a favorite
of mine. When what could right now
that I like? I'm enjoying Miller's

Batman. I'm sure there are other
ones, I'm leaving Miller's right
now.

AM: How can you get a bit when
you visit for artists in comic
shops over your work and others?

Starlin: Oh, Jack Kirby. Steve Ditko
and Joe Kubler. Those were the
pages that I thought with the most
AM: Also you were keeping artwork
of the whole Kirby era correct?

Starlin: Yes, that was getting
over my back.

Starlin: He helps you get out
back I used to read more back
(than there) they're getting into a
couple covers that I didn't get back
I know when they send a set back
and put up and said before anyone
etc it off in the warehouse. There
are a few papers here and there that
I didn't get back I didn't have any
number and I think the whole thing
that Marvel is doing with Kirby is
just outrageous. I can't believe these
people who, for all their old pub-
licity are living off Kirby's leg-
acy are being so unappreciated. At last

now I mean, this is a job they
should be doing for him. They
should be giving him a steady job
like on the other side but that com-
pany isn't doing that. It's trying to rip
him off with his artwork. I just think
it's terrible. It's got to really hurt
it to folks like Miller and all the
Golden Age, for the work
they're doing. I'm trying to help
them on this.

AM: These companies are, you did
a whole book, Dorian. Is there a
character that you like to see
going to get up again or do you
want to see him?

Starlin: As a matter of fact, Dorian
appears in the future of *Deadman*
in an indirect way. Dorian was a
character I did for Warren. It was
just after *Blackout*. I was in a point
where it would be really weird with
magic workers and some magical
world. He was just sort of a thing
to do for a while. It was this magi-
cism in the past was a chance to do
some things, and I think I couldn't
leave alone up at Marvel. He wasn't
a very nice person. It gave me a
chance to do this little *Deadman* thing
I had drawing on my head at
the time. He was a fun character—
like I said, he plays an indirect part
in the future of *Deadman*. Nothing
that I want to talk about at this point,
especially seeing as how he's related
to *Wonder Woman*. He figures in
one of the way that *Superman* is
in the back of the *Green Lantern*.

AM: How was it working at Warren?

Starlin: It was a lot of fun. I was
in a point where it would be really
weird with magic workers and some
magical world. He was just sort of
a thing to do for a while. It was this
magicism in the past was a chance
to do some things, and I think I
couldn't leave alone up at Marvel.

FIRSTLOOK

Jeffrey Butler, the co-creator and original artist of First Comics' *The Badger*, returns to the series for one issue this month. In *The Badger* #171 covers, *Badger* super-hero takes up with a buffalo to hunt down a teenage thief. (The great power is continued from the last issue of *Amazing Heroes*.)

BADGER

BADGER

BADGER

BADGER

A ONE-ISSUE MICRO-SERIES — NEW FROM THE SOUTHERN KNIGHTS TEAM!

Parade-kidnaping — or FRED for short (which he is). He's chasing... anything from anywhere for you — if the price is right.

DIANCA — Fred's partner. She's never met a lock she couldn't pick (except the ones on Fred's house).

Transformers? Well Go (oo?) **Beh!** The **FREDMOBILE** bears them all in a sleek, FL car that can turn into ANYTHING (not to mention, travel through space and time!).

Fred and Dianca aren't without enemies, however — not one, not two, but three separate agencies want them!

The **INTERPOL** (International Police) agent wants them — regardless of consequences Flambo would do for the guy!

The **I.R.S.** (Internal Revenue Service) agent wants them. They haven't paid one thin cent of taxes on their ill-gotten gains!

The **NEO MAN** wants them — and the Fredmobile! It's been five years (relatively speaking) since Fred bought the car and he hasn't made payment on it yet (which is ironic, when you think about it). In fact, Fred hasn't made a payment at all!

Now all of these "people" are converging here! Fred and Dianca have been hired to steal **Earth's greatest treasure**. Not the Mona Lisa? Not the Venus de Milo? Not even Chase Drankley? What could it be?

X ARISTOCRATIC TRATERRESTRIAL TIME-TRAVELING THIEVES

A COMICS INTERVIEW Publication. COMING THIS SUMMER!

was understandably well. "This was about April or May of last year. The whole concept [of *Zephyr Smith*] came full-blown within one hour. I'm not talking about the whole story, just the concept—his, within an hour, and I immediately what we wanted to do and where we wanted to go. I had some ideas that I had worked out—Dexter doesn't mind me writing these things—and I had the name [*Zephyr Smith*] around for awhile, but under another concept."

"The basic premise for this idea is one that I've been interested in for quite a while and Dorian likes it too. What of a character like Rock Rogers came back to his own time and had to pick up his old life?"

Man with a Mission

Hobing and Mallonee don't plan on giving away too much about Smith right off the bat, but it's safe to assume that Smith has his come from "about 800-900 years in the future. He was there through some sort of time-warp process, found love and adventures, and decided to skip—well though he had a fairly bad rap in his own time. He was married to a Japanese woman and they had a very young daughter."

"His name's not really Zephyr, it's Ethan Caldwell Smith. Ethan's a nickname he picks up. Actually, he's a nuclear physicist from back in the mid 1950s. That's where he disappeared from, and it's almost 20 years later exactly that he appears in our time period."

"He has a mission, of course—what were those days about? Well, he has a chance to come back to the present when they [love] Hobing, cryptically) have specific need of him for a particular reason. When he emerges, he's surrounded with his wife and daughter, both of whom are now 20 years older."

"He comes back because his wife will die unless he comes back, but she's back here to die—oh, I don't know that he's had a figure

from the future and helped him because he's found to make mistakes. They figure, and we can't affect my mission for people who know the future. There is a character, that, on the background who often comes with Smith, but it isn't an actor in such as anything else, just in case something goes wrong."

"Hobing chooses to add very little to that brief outline of the story, preferring to the details to be provided gradually in reader's life. However, make mention of Smith's primary antagonist."

"The villain of the piece is an individual. He has to suppress powers—he's more along the lines of a latent latent outline, with the classic big bodged who is an as a piece as physical combat, that kind of stuff. He's a very old man, older than his years. What he's done has aged him. Eventually, he comes into conflict with our hero."

"Dorian knows what has to be done—out of context, he can't reveal this to anybody—no, basically, he just people to train him as much as he can."

Far Beyond Those Of Mortal Man

"We know how Flash Gordon could climb all the tables even though he was a jerk piece of the great, well, that's Smith. Move that anything. He's going to be a very charming guy," says Hobing as he explains a little more about Smith. "He's

brilliant, but he knows it. He's got to struggle the use of "Mortals" that needs to make him clearly confident. Lots more of the gene heroes, literally added solutions leads. Completely. That's the kind of character he is—total heroism, but remember the skill. Along with the coming gene-meds he's got, he's able to do futuristic things."

"The mysterious transporter built Dorian's mission—its got from "what we would consider superpowers," but only to a limited extent. "He has tremendous lightning abilities—let's not talk) because he's a more intelligent, far-seeing advanced from him. He can phase in and out because of the time-traveling device they give him. He could, in a fight, disappear and reappear behind a partition, the way. Add that to his flying ability, and that's a lot for a character. We don't want to overdo his list of gifts."

"Overall, we can come up with all the gimmicks we need along the way. He has the things he's brought from the future to aid him in his quest, the scientific gadgetry. He

will have an anti-gravity device that we think is novel and a lot of fun. He carries a blaster, as well, and it will have extraordinary powers. Any time I can get a gun and to draw it on the next issue is something else," laughs Hobing. "That's all the more fun for me. One of the things the gun does is creates an anti-plasma effect that totally obviates all the matter it destroys—that's the type of concept we're looking at [for the series]."

"Essentially, Zephyr describes all the gadgetry and things that become the kick factor, but it's also got some fun with personalities. It has a flavor of *The A-Team*, because he has a group that he works with."

The Crew

In the center of his quest, Smith finds that his daughter, Skylark, is now a grown woman. Moreover, she's lead singer for The Crew, a rock and roll band—actually, says Hobing, a group of performers who are basically "a small rock singer group. They're a group of rock musicians from around the world put together by the government to work with the rest of the show business world. They're a band much like, say, the Earthtones."

"The Crew consists of five members: a small, frumpy character named Link, a large Thai character called Bronson, a large, aggressive woman known as Annie, a small, Japanese guitarist of Skylark's named Sebastian, and the final character, a Chinese musician, a Prince-like character known as Nepheladne. All of them, says Hobing, are "in a sense, rock and roll vets... which is wonderful, because it lets them look like the experience" What a great little premise to be working on!"

"We want to collect a little bit by the *Starliner* theme. I really liked the idea of the rock band and saw a great opportunity to use it here. In all around us natural to use what I figured well by it and use what has

been one of an attitude." Hobing stresses that the upcoming cast of *Zephyr Smith* will be some familiar faces, for instance, Don Strick's *Falchion* crew. "In this particular format, there have to be a lot of extreme life and death situations, and certainly some people are going to come and go along the way."

Elements and Influences

Obviously, *Electric Blue's* roots run the book as a subtle pulp-oriented strip. Other comics have come close to the feel and ambience that Malibu and Hoberg are striving for—specifically DC's *Comics* *Maxx*, which Hoberg recognizes as a concept drawn from the pulps but which he feels was "a little too strange" (Dellorto) and a few other titles have exactly the feel I want to grasp, but I have a feeling that *Electric Blue* needs to be more direct. This whole thing is built around emotional reactions between the characters. I openly admit that it's a soap-opera thing; that anything else—a science-fiction soap opera, it's going to have a lot of fans and hoards—after all, we're re-examining a man back into his old life 20 years after the apocalyptic event, and they're all a little infatuated with him.

Glenn and I don't see always the side of the day, though. "I want readers to be able to laugh at some of the things, too. I want them to be able to go, 'Ha, what a jerk,' or 'Yes, didn't she think twice about what she did here?' That kind of stuff."

Another element that is important to Hoberg is that *Electric Blue* is

set in the present. That, he says, allows for "good, grotesque artwork. All the best scenes are set on that new time frame, and not coming back the consistency of time, which is what I wanted out of it."

Beyond the Future

Again, one of the most surprising things about *Electric Blue* is its present-like Europe, *Benign* and *Malibu* is making a serious attempt to provide the market with color comics priced competitively with DC's and Marvel's. Says Hoberg, "We're going to try to make a real competitor. If the book goes up to \$50 [between now and tomorrow], don't get mad at us—Glenn and I signed our contract at \$1.25, and we're really trying our best to create a product that can hold its own in the marketplace."

"There's no other way to do a red or super-hero book and succeed at the marketplace," adds Steve Lewellen. "When you're doing a color super-hero book, you're entering in a market where readers, and you have to be able to sell your books. For that kind of price. I don't think you'll ever see *Starline* completely written by color super-hero books, but it would be nice to have a couple out there if they're successful."

Malibu and Hoberg plan on

doing *Electric Blue* as a series of "two-page novels," with every full-length issue comprising a complete story "much in the vein of pulp serials like those of *The Shadow* and *Doc Savage*, though we're going to try and stay with science-fiction stories. We're going to draw lines as to the literary aspect of things and more into the genre themselves and the super-action. We may get into the classic super-reflex thing every once in a while, but more or less, we're playing with characters who are more realistic."

"Quite a bit is involved by the end of the six issues, but not everything. The main plotlines and danger will have passed, but we will reach a point where the reader will be wondering what [Smith] is going to do if he remains here, and what the character's remaining around has to mean for us."

"I have to admit this is a big step for me. I'm not doing it for my own self-motivated need, more just fun and entertainment for people who enjoy the same kind of material I do. *Hero Games* has already captured the thing, and [other role-playing adaptations] seem to be coming out no more than a couple of months after the book starts. It's really unusual by it—they seem to be taking by the whole project, which is fine by me."

AS IF YOU WERE HERE, YOU'D HAVE TO SAY IT'S A GREAT SCENE AND THE BEST!

ESPERS

By Sue Deasum

The idea had been knocking around in Jim Heckel's head for quite awhile, but seemed to waver. But it won't pass the writing that appeared to him; he wanted to write a comic book that appealed to a wide assortment of people—in mind, age and gender. How many writers have been trying for years to appeal to a wider audience?

While kids pick up *The X-Files* and *Iron Fists* in the adult non-sensationalist and adults are drawn to *Love and Rockets*, *Blade*, *Manhunter* and *Damage Done*, there really aren't too many comic books out there that have a multi-layered plot which both young and old alike can share. What Heckel is trying to do is bridge that gap.

There has to be action, lots of action. The comic medium just doesn't lend itself to static plots. Of course, suspense moves the action along, there had to be plenty of it. Super-heroes are popular with kids of all ages and whenever drawn at female readers who wouldn't normally read an all-action

story. Now we have plot elements that make up about three-quarters of the comic book sales every month. But there's more to this idea: does just unbridled enthusiasm and an audience exist?

Every time the first product, a four page mini comic that should be out by this summer, is expected to premiere in early July and will be available for a 99 cent cover price. The mini series is just the first of a line of "essays," each one will be four to six issues in length. If these "essays" are successful, they will be the first of a graphic novel with semi-serialized added.

"What we are attempting to do with *Essays* is just create a comic that achieves a literary level of quality. I realize that this is a niche but passionate claim for a niche that isn't filled, but that is the niche that the stories are able to connect—mature and intelligent—but they also have elements that will appeal to kids," said creator Jim Heckel.

Actually, Heckel isn't a total stranger to the comic field—let's be

Mick Austin's pencil rough for the cover to *Epic 21*.

Making *Dances for Striped Cosmos* and it has been known to some readers for his intellect. The *Epic* Express.

"This is my first published comic," said Redford. "David [Lloyd] is

a real professional and is excited about this book as I am. I think that people will be pleasantly surprised by what this one of us have come up with here. We both have the same strong desire to create the best

comic we can."

Redford and Lloyd have collected various reasons of factors mentioned on the design rationales where *Epic* is well taken place. "I carefully check the geography, the language, and the culture area before I write a scene. We want the reader to feel that they have been transported to the place, when the director explains, I happen to believe that realistic settings and believable characters will help the reader fall right into the tale. Each character in *Epic* is a real human being."

This is not to imply that Redford needs to be unique—he says he has met Alan Moore and Frank Miller, the master's masters of realism in comics. Redford stresses that level of realism in *Epic*.

"I want to emphasize that even though that is a real-life super hero story, it is in no way intended to be similar to DC's *Blade* or any such other book. What David and I are doing with *Epic* is to create an old-fashioned action for the comics crowd that is also an acceptable story for people who don't read comics. We want to reach out and produce the 'normal reader' as well as the comics fan."

Lloyd is best known for his work

with Alan Moore on *F for Freedom*.

If you've followed the *Blade* series, you'll know that Lloyd says particular attention to detail. "Not only am I concerned about good writing and thorough research, but David and I want the art to be special too. We are both dedicated professionals with a desire to break new ground. With this in mind, we've come up with many interesting details to add more more quality to the book," commented Redford. "I've also spent no expense to get some of the best artists in the business to do covers." John Bolton, Mick Austin, and Terry Lewis have all agreed to do fully painted covers.

Linda

Alan

John

Alan

Terry

David

David Redford is also expected to do some publishing, he has not signed anything in this area. I want to talk with him this as it seems well worth the price tag.

"I had a whole story series... in a single picture with a background, a personality, or simply just a bit of their own. I research the backgrounds of each person I create to make sure that they aren't contradictions or contradictions."

The characters vary in ethnicity as well as personality. There are two leaders of the *Epic*s, Linda Williams and John Bolton. Linda Williams is an American who lives in Mexico. She's independently wealthy and acts as financial backer as well as group leader. She brings the team together to find out her father from a shadowy secret organization. She guides their diverse *Epic*s through her own *Epic* ability to particularly make the demands of any complex, mysterious on the world. However, the first book the geographic location and she must be sure that it exists. She can also talk in radio and mass-media, television, newspapers, probably look through any microphone or "bug," transmitting anything to any radio or TV set as she pleases to see about her situation (what? She only sometimes is knowing where she is standing or moving).

John Bolton acts as the team captain when the *Epic*s are on a mission. He has a former military and smugness of art interests and growth. He has a 60 second per second nerve ability that allows him to avoid enemy attacks on him (the enemy's attack against them). He also has the ability to absorb information almost automatically and processes it upon level of ability to most mental and weapons training. McVicar has the ability to attack an opponent with incredible reflexive speed and strength. He can be on back or opposite 30 inches per second.

John Bolton's cover sketch for *Epic 20*.

Between these two leaders, the team that Redford has created is unique. Lloyd commented, "Epic 20" is very exciting! It's a story about super-powered individuals [that] can appeal to both fans and

people who don't read comics. This could be the start of a whole new approach to comic book characters."

While the first issue is mainly concerned with the gathering of the team, developments in later issues

THE KATZ ARE BACK IN WHITE 'N' BLACK!

**ECLIPSE
COMICS**

Bob Laughlin's Kuddlesome Kitties win a Fish Car and take a trip to Bigtown in K'n'K #3, on sale this summer—For Kids and Kitz and Kitz of all ages!

...and that's a thing... are coming...
...they're people...

There are two women in the group—Michelle and Elizabeth. Michelle is a former leader and financial backer. Mike Kertz became the team leader after the girls left the group. She was a former leader and financial backer. She can teleport to any place on Earth as long as she knows exactly where she's going. What she's hoping for is that she can do something with it, except use it as a defense. She can also create a force field around herself and others. These fields can be moved as well and at blinding speeds, which there is no sense of movement for the people inside the force field.

The other members of the group include William Scott, first an American Indian whose powers of strength and invulnerability rival The Thing and The Hulk—he can generate a force field that enables him to take small rocks in his hand, being able to keep up to 100 yards and run approximately 45 miles per hour; Susan Ashley, a Japanese schoolgirl for the time and, apparently enough, has the ability to create heat and flames as well as extended heat-energized, and Eric Tinkler, a Japanese student who can become the conduit for large amounts of electricity, in addition and does it in a charmed form.

Huddell decided to do away with pseudonyms like "The Heroes" or "The Women." While the characters will have distinct duties, functions to protect their identities, and many are not as private. The authors are chosen to provide both with something unique to the pseudonyms while keeping the cost of such names within the realm of believability. Characters are created so that Huddell believes that there must be an overall continuity in what they wear or possess, but so long as the characters are chosen to bring excitement to Mike Kertz, that's the main goal. The series is during its first season for cartoon and parody. It's the first series to be printed in all four sections so far, so to draw attention to it.

"I'm trying to create the 'Kitz' Silver River of comic books," said Huddell. "There is no book like Kitz in the market." He is deliberately breaking all the rules. He wants the reader to enjoy an original comic for a change. If Jim Huddell and David Lloyd ever again meet, we are definitely enjoying Eclipses for a long time. ■

solidify the comic direction. The stakes are logical, dealing with stress and the ongoing situation. Huddell plans to introduce many interesting subplot issues, but social commentary and lots of jokes.

One of the Eclipses' main appeals will be a series of non-sensationalized. The Circle. The Circle is a series of short stories with many levels, social commentary and lots of jokes.

There will be other titles that the Eclipses will encounter but The Circle is the expansion of Starlock Holmes. Mystery—the proposal for. Because of the main beyond imagination, it's a very good

possibility that the Eclipses may never reach the top echelon.

An appealing aspect of Eclipses is the strong female characters. Said Huddell, "I'm also writing this series in that it can be appreciated by women. I feel that there is particularly a comic's audience in the U.S. market. What few comics there are that women would enjoy reading, only a handful are good if that may. Since women are granted readers, they were (especially) that so, I feel that it's easy to open their eyes as an audience. Therefore, in that sense of male and female role play, attitudes and personalities are carefully constructed. My women

CLUSTERS

Art Green, former NFL color commentator of football, and author of *The Fish*, is among the first wave of comics publishers assigned material for DC's new line of 25-page monthlies. He asked the company "What's in a name?" a friend of Mr. Green's of long standing to interview him on the project. Jason Chubb, done an introduction with Alex Pines.

have associated with phrases involving evolution. Jim Mayer (the one—performance of a minor but certainly a lesser personal style) is about nature and normal life; into the grasp of a vast vacuum solar system, along all scientific law. Gradually, this reality is in making her presence in an expansion whose function continues to replace that of the human brain.

Clare: Finally. The first version of Space Chasers, however, was a resistance to the process I submitted. Only the last paragraph is completely accurate. "Space Chasers" will be the first part of a series. Planet Storms is another part of an intense psychological drama in the tradition of Huxley, and you should part will be an experimental New Wave of attack on the comic page—a wide appreciation of the most history of mankind?

Clare: Overcoming it, that, would you? **Clare:** I think so. This is an answer with me and you. As I was saying, over as this embryonic stage of development, some of the building blocks of Space Chasers in its final form can be seen. The finale is up with a personal observation with using project data, a male within whose vision is the first real personal form to be with done, and the realization of this world played out in a stage where some kind of apprehensive function is developing.

After all, if mankind is just earth and living, intelligent, or some mechanism as we yet don't understand that which we might either promote or resist intelligence is achieved, then it is not the same as somewhere in this vast backdrop we call a universe, that the function of the human brain might be explained as some analogous act on a cosmic scale. It is possible that under the right set of conditions, with the right kinds of electrical waves and radiation being emitted, a solar system could be used to do it. It is subject to a slight thought would be required to a human observer, and he would have no choice but to regard the manifestation of the solar system's intelligent thoughts as politics.

Cl: I understood that. As a degree the production scale of the story, what's to prevent the final resolution of the conflict between your ego and mine from being just like all the other scenarios on all the other groups? **Clare:** I don't think you're real or could be denied either. **Clare:** Strangely enough, that's no-

ally the question I asked myself eventually I let upon the solution that my five characters should, at some point in the story, actually become actual personal entities themselves. The resolution of their conflict will be played out in a way that affects the psychological status of their previous selves, but in such a manner that gives significant freedom to see of circumstances.

Cl: Do they become the Space Chasers? **Clare:** And what the Space Chasers are is directly connected to what they write. The rates on character face, what they live by and what they stand for (as opposed to what they think they stand for) will live on after them in ways they could not possibly have planned during their live lives.

Cl: This brings us to the next logical question. **Clare:** Yes. Who are these people anyway? I decided to stage the book in a way that creates tension, tension I've glimpsed in our own, present-day society. The first, though minor, was merely a slight trick I used to increase my own sense of unreality in my own human world. Throughout most of it's history—beginning in the pulp, and continuing into books, movies, and comics—the vast majority of heroes have been male and have been Caucasian to boot.

Cl: You mean RAPP? **Clare:** You hit the nail right on the head. The demographic reality, our own, demonstrates that in future generations, what presumably may create world nations will progress technology, starting from a computer conspiracy with the Europeans and Americans, the majority of mankind will be governed by a mixture of humanity quite different from the city state that you're referring to. **Cl:** W. Campbell, almost none of Attending at Study. But a slight change in perspective means only a change in perspective, other than reflecting my personal belief as to what the future will be. In the character's history had to be overly realistic. But the question had to be valid fact because the design of a comic character must make some kind of visual statement. The job of the writer is to provide the arena with the clues necessary for the reader to make that design.

Cl: The arena? I just realized something? **Clare:** Yes, again, as far you don't remember the spectacular amount of the arena. **Clare:** Don't worry, I will. Now

let's be a good interview. Mr. Kinnear, and such to the subject. **Clare:** Anyway, after I had some idea of what I thought the characters should be like, I decided to describe what kind of social forces would shape them. I had to know why the cop was a cop, and the villain—a murderer—who's probably killed the cop's father—was a villain. Because by the cop became a cop or a bad cop, police, and the cop was not, obviously because he had seen the father being murdered. **Clare:** I decided that, simple mechanical logic—which was all I had time for—demanded the father be a possible offspring. However, I thought a single male always inheriting it, yes, so a touch the villain was the son of the Earth, so the cop would have a legitimate beef against him, but also that the pure would group to be a man, associate in the eyes of society, possibly someone who can kill if necessary, all right, but still a decent man—was born suited to the function, normally the cop is chasing him.

Cl: Was a man? **Clare:** The change the question considerably. **Clare:** I can't do, and it is a way a game and fiction itself is a way writing the first few pages of my outline. And in a way a game out of a brief fact I had as a start were for an extensive project of Lacanian. One of the books George Lucas had wanted to read, by way of providing insight on what he was thinking about when he worked on the Star Wars series, was the story of Enlightenment. The meaning and importance of Henry VIII by Brian Bales.

Cl: The French child psychologist who made his name with the field's analysis and training cast of adult schizophrenia? **Clare:** The same. Doubtless to be the French, but I think it's the importance of study into a child's development in handling the problems he has to face is like from the others they had on his parents. One of the points in Bales's book is that the violence in early stages of life takes—the head chopping, the hungry wolves, etc.—always which occurs tends within children to drive home certain symbolic points. One of the more violent elements have been noticed—something which happens today because of the same thing. It's the same, every constructionist who has no own laws, produced ideas about how the society will think because of the same should work, especially on children—the they take back

mark of the impact that gave a meaning to the first place. To make matters worse, the folks often become less remembering—they contact the business center of being boring. As a consequence of my exposure to Metablasts, alas, I thought of my "villain" as a kid who would have gone straight if he had been exposed to violent or capricious films at the right age, films which, for all their artistic merit (even, at least would have helped him work out certain basic questions about his existence.

K: The way some "darker" movies do, for that matter, some have real message or any other sort pointing that make's parents nervous, help some resolve their identity crisis or help them cope, however emotionally, with questions of life and death?
Cover: Uh, sure, what you said. Anyway, I conceived of my "villain" as a man who had suddenly been exposed to the pipes and he wanted to immerse into a solid—essentially the kind of Aesop our cop became but never to regress, because the end his government believed they were the root of crisis, instead of a possible solution.

K: Am I to assume that the resolution of these themes in the final action of the story reflects your message about the value of the end as well?
Cover: Absolutely.

K: Okay, Cover, that's all well and good, but you know as the Space Classics come in?
Cover: They arrive after our heroine and she's been hit through the back hole.

K: The third hole?
Cover: That was the third impact that hole talked about first. He said, "They hit through a back hole. I really like that." So did Alex. I attempted to get somewhat accurate on this matter—although the character's metamorphosis is triggered by a pseudo-scientific plot device.

K: In other words, you couldn't deal adequately with the phenomena of the more horrid, the irregular, the creature of your genre.

Cover: And the flattening of space, as you'll see. I also must confess that the black hole was electrically charged and rotating, which is the kind that can take a traveler to another universe. I considered another possibility—the anti-gravity universe—for a little while, and might have used a 3-D folded enough paper attempting to derive a line toward rapidly exploring the mathematics. What the audience sees? **K:** Will the final action comprise the end of your answer?

Cover: I think it. And now I had to look up the information on William Kaufmann's *Black Holes and Beyond* sometime, to make sure I'm

remembering the terminology correctly.

K: Are you just trying that to hedge your bets, or do you just want some people who don't know any better to like the story even more when they are the answer is "perfect"?
Cover: That's for me to know and for you to find out. This is a standard professional genre, after all.

K: So it is. When are you going to start producing?

Cover: Right now, though in a way, I don't really have to. By now every reader of this area has noticed the black-and-white illustrations coming through this copy. What I wanted from Alex was exactly what he had been asking to illustrate for many years—a graphic story that would permit him to study our comic, although all he had learned from covers, from the classic illustrations, and from what he was accumulating for working in the animation field to create both serious fictional and psychological realities. He wanted to tell a story that would flow smoothly for the general reader who doesn't care what authors say or produce casual poems, and which would as well appeal to the reader who was tired of seeing names told in books.

K: How did he do it?
Cover: Let me put it this way: many

exceptional artists have illustrated my work in the past. Tim, Kati, Ron Cobb, Neal Adams, and William Stout, to name just a few. Alex has set new standards for the comic visualization. It'll be a long time before anybody tops him.

K: And you're even only the black and white?

Cover: That's right. Alex had to send the colored originals to New York before I had a chance to see them. This is the first time, by the way, I made from the first few pages of *The Moon That Almost Adapted*—the Alex has administrative networks for general consumption. *Space Chasers* is the debut of his full capabilities.

K: And what's the water in the final product?

Cover: John conceived it up this way: "The Mark and what may be spectacular, but the colors are simply breath-taking. It's like the difference between night and day."

K: And what about the final copy?

Cover: I figure if I've done my job right, the reader won't even notice that it's making a copy. The copy was through several drafts, even before John saw the first one. And at the second draft, I made several changes in addition to carrying out his suggestions, which included cutting the copy in the first section and emphasizing on the colored grammar in the group mind response.

K: The group mind?

Cover: Certainly. I think it makes the grammar would be somewhat distinctive and also to Texas, and the communication which is after all exactly what the water is doing in this kind of copy.

K: Mr. Miller, I don't care about the grammar? I want to know more about the group mind?

Cover: For that, you'll have to read the book. I'm doing this in my own self-interest, you know.

K: So what's the connection? Is *Space Chasers* a therapeutic graphic novel? Does it actually attack the boundaries of the comic?

Cover: That's not for me or DC Comics to say. Naturally, I have a lot to offer final analysis, all that's a secondary consideration.

K: What's your first?

Cover: Alex and I both wanted to tell a story outside anything that's ever been written before, in an unbroken—books, comics, film, plastic communication, etc. I think in that regard, we definitely succeeded.

K: But it's a copy?

Cover: Yes, but your secret *** is over!

classical comic book era, is back
for another go-round and lots of
entertaining fun!

we're not sure on the lines. Good news.

Comics which has achieved a readership of approximately 100 million in the length of its career, has a number of Japanese comics, but strives to make the rich American audience rate as well. And I can think of no better source to review than *Ameri Quest*, bringing from the long list of creative talents who have offered to work on the book. I can't say there alone in my high regard for the series.

The first name on that list has to be Doug Waddy. How lucky is it that a younger comics fan has his highly intelligent work on the western series. Doug Waddy, who has been interviewed in *Ameri Quest*, is not only appropriate that he is helping the very first in this series.

Somewhere in North Africa, *Race Racers* (who was always my favorite character in the original cartoon series) accompanied by King and his wife, and a young girl, are on the site of an ancient lost city. They find a lot of treasure, but they also encounter danger and political intrigue.

In a mere 17 pages, Waddy successfully captures many of the elements that made the cartoon so successful. The *Tomb Raider* characters, including Dr. Querwyn, Bartley and his son, are so memorable that *Race Racers*'s comic book series, *Race Racers*, makes a timely appearance and the video behind the political machinations in the *Quest* old series. Dr. Zax.

Waddy also pointed this story which takes an amazing appearance in the film and philosophy on which the movie is based. Using his beautifully rendered cover that serves as a paperback, though I don't think anyone will be disappointed with the artwork on this is a tale well told. I found it somewhat surprising but ultimately interesting that as I read the first story to myself, I could actually "hear" the dialogue in my mind—spoken in the style associated with the all-female characters.

The second story in the issue is by the studio's regular writer Bill Jackson. Larkin, with artwork by Steve Bantz and Mike Boyer. Bantz does an excellent job of maintaining his own distinctive style while simultaneously capturing the spirit of the book and the main characters. Boyer's art is solid and Larkin's script is beautifully written with Bantz's solid style.

My only serious complaint, as the letters say, is to improve the last

story, which is by no means to be regarded by anyone viewing this thing as less. The tale does not end so much in a cliff-hanger, with its own or read discussion. It's more like something being told. Larkin demonstrates that he can handle the right, fast-paced action to read to the series, and it is particularly applied to the dialogue, leaving everything that character has to work as a writer.

Larkin truly begins to work in the second issue with a story that spotlights the death of *Ameri Quest*'s mother and the first meeting with *Race Racers*. Larkin delivers a tale filled with local and action, with all the usual, even promising, *Race Racers*'s death in a manner that is touching without being maudlin.

It is a pity instead by the same quality of an issue of *Waddy, Pan, and the Stars*. *Lark*, *Waddy* is a collection of his own style and work through, you remain true to the classic spirit of the series. Her strong, yet subtle, direction of the illustrations. Mrs. Quest's copy-pasting King's face in her hand is one of the more reader scenes I have ever seen in a comic book.

From what can only be described as a hostile origin, Comico has given me one of the most interesting publishers in the comics field today. There is no question in this style, none of the false conformity that is often made, unless otherwise.

They just go to mention to many people as possible. It is a world that is often too much with it, but it is not such a poor reputation.

This second in this series with *Ameri Quest* is a recommended. See *Ameri Quest* in the young and should prove appealing to a new and older side. Try it.

SEVENTH VEIL SALOME #1-2

One could have been surprised, when Doug Bennett was drawing the adventures of Ace, that many years ago that he would be one of the most classically script artists in all of comics. His name is listed in the credits for the original to the beautifully made story of *Salome*. He has drawn his inspiration from both other writers as the Bible, Richard Strauss, and the heavenly thought Oscar Wilde.

Larkin's *Salome*, other special adaptation, the story of *Salome* is available as a full audience. As presented here, it is a very strong, much-needed dose of last, other-

and, passion defined.

Bennett is a highly skilled designer with a strong, yet subtle, direction of each bit as it is scripted. Every comic creator should always bear in mind that whatever design can suffer without words, they should be allowed to do so.

An excellent example of the cover on the very first page, a drawing that already tells the tale while giving it his compelling feeling. The thought had been about his head comes to words, but rather the picture of a decorated soldier, slipping with sadness. Anyone who cannot see exactly what *Salome* is doing should be reading *Top Dog*. For all others, it is a delicious treat.

Disturbed by the enormous amount of the series, *Salome* flows to the courtyard outside to palace. There, as usual, carries the proper dialogue (like the *Rapture*) in a simple and direct way. Her words are brought from the wilderness, she protects the coming of the Messiah and more dangerously, she is who had previously been sent to Herod's sister brother.

Having *Salome* try on his armor from the darkness, *Salome* does to see the man behind the scene, and ends here to be brought forth. *Salome* is especially forbidden to Herod, but *Salome* was her as divine dancer on the grand Sabbath (she is mentioned of her), and the plot is allowed to see out of her prison.

Salome is a tale well told, and even here, his rough hair-chilling stands out in a clear contrast to the

Of the nearly two dozen that started the X-Men comic, even close to drawing of the title. In my opinion, the only graphic novel on the shelves today is *Hooky*. Under my definition, *Hooky* does not qualify as a graphic novel.

It is a book, child—perhaps—comic book. I would not care to argue with anyone that Ben Wrightson's art would have been weakened somewhat by similar and cheaper paper—obviously a would-be artist might be able to do better. their newfound power, did both an detective conspiracy, gave them the code names Blue, Orange, Knightley and Sandbar—color: evenly dressed down The System and they talked their love to light cream. They were sure to question what this has to do with UFO investigations.

Likewise, Mr. Chouderon's last if necessary to attract his 100s reputation of a few facts. After they have discussed a gang of thieves, they are answer that a second team of men, superpowered. My new agents would then calmly consider the apprehended criminals. They were talking "let him, let justice".

And only Cross knows about the existence of the System-Gate, a special portal from which opens in unity of deadly silence.

It would quite obvious that, while the two men were the consensus, it is Mr. Cross who would be the real power!

Let's get another obvious piece out of the way first. We need another superhero team comic about as much as we need *Star Wars*. There are so many great titles on the shelves now that you can't keep the names straight. I have a theory (and I'll say it) as to one possible reason we're doing so badly these six months.

Look back to the 1960s. Super-

heroes speaking, I think that there were left in every aspect, but as we have today. Now look at the social classes of that period. So be sure there were more parents, since, an explosion of commercial living. But the greater emphasis was placed on the individual. We all wanted to "do our own thing." The "individualism" was looked upon with distrust. Continuity was the main taboo. Our heroes were gone.

Today, the emphasis—both governmental and socially—is on "team players." Many people seem to have lost the need to maintain an individual identity. They seem to find definition only in terms of some large value or idea being.

Mark Hamill presented a strong case in arguing that commercial comics have begun to reflect that same homogeneous attitude. Today's kids don't want to be the Lone Rangers; they would prefer to belong to a tribe of heroes!

On a more practical, and perhaps equally valid level, comic books are probably still an economic failure as well. It is certainly cheaper to publish one book having four heroes than it is to publish four separate titles. There is also the hope that I suspect members of the audience don't like one of the characters, they will love one of the

others.

Regardless of the reasons for this performance, there is no question that comic books sell in today's market. It is therefore completely understandable if not admirable that comic companies—whether the largest or the smallest—will be compelled to publish more and more of them.

And (quote) Allen Davis has not done a bad job with *System*. While there is no evidence of the creative drive to either the plotting or scripting, his drive to keep appearing to be a reasonably good player of the boxes of writing (which is more than can be said for many of the writers whose work is currently on display).

Davis comes through with a more potent script, though not the drive to still his reader's fears. Some elements, such as the origin sequences, are not fully developed or well paced. The melodramatic dialogue is typical comic fare—fairly well-written in style. I also think it is a mistake to try to do a comic book off with a story that is at best specifically complete in one issue, rather than presenting a tale that seems to be merely the opening chapter of what will probably be a multi-part saga.

The same criticisms apply to Davis' artwork. By most standards, it would be classified as quite professional. There are indications in both his penciling and inking, that he is capable of doing good work with care and refinement. While it is not one of the highest caliber, suffice it to say that he will bring his best to the table.

The photostatic copy I received also has a minimum redeeming merit: that the actual book will appear as "flat" rather than "curved"—whatever the hell that is. Not that I care greatly, so long as it isn't too curved to the standard. The envelope?

In summation, *System* is a book of promise not yet fulfilled. If you are a fan who considers every new book to be a necessary acquisition, this one will probably not be greatly disappointed with this effort. And even if you hate team books, it wouldn't hurt to snatch through a copy.

After all—it's a masterpiece!

THE MINDY CITY Lois Lane #7

Continuing where I left off in my review of the first issue, page 6 of the Lois Lane miniseries.

Having stood witness at the occupational body of a small child was pulled from the rear. Lois is determined to turn her energies toward alerting the public to the growing problem of missing children, starting with a lost page account of the same on the waterfront.

City Editor James McCullough has other ideas, however. She tries to let it happen, so maybe her famous, delicate editorial policy. McCullough chafes head-on with the young girl Lois. She's determined to follow up on her no matter what. Her digging brings her to the office of ChildSearch, Inc., where she discovers the kind of exposure to the parents of an abandoned

lover named much for Lois Lane. Even as a child, it was painfully obvious that she had no deep depths that were dark. As portrayed by a plethora of male writers, Lois kept an unrelenting amount of love trying to attract Superman's secret identity. And such was the sensitivity of his love for her that she was constantly swooning over any powerful man who displayed the slightest interest in her. She held about as much appeal for me as did a beach.

Writers' insecurities were expanded somewhat in the late '60s and '70s. Lois no longer gets by her love, devoting various departments aimed at convincing Superman to fill or pointing him into marriage. The direct wife often put a case and, however, she still behaved like a wife from an old newspaper comic.

Today, a young young female is trying to attract the love of Lois Lane, and I wonder no longer if she is the same character as being a silly piece of fluff!

Now... she's a bitch. I can't remember the last time so many pages were devoted to an unlikable human being. Lois is just so shallow as ever. But now it is characterizing as well. Profoundly, she behaves like a predator child—obsessing that things be done her way or not at all. Through amnesia, she attempts to not roughed over anyone who stands between her and her objective. She is oblivious to the evidence.

On a personal level, the woman is more more desperate. Where she fell for every man she came along with a beautiful face and a steady smile, she now sees to think of men as mere coins, women. After all, she doesn't want

to go to a chat restaurant about following an arrangement of several with her. Lois' later Lucy attempt to talk with her. Roger Jr.—Lois is now busy covering her story.

As we suggested to believe that Lois really cares about all those missing children who she is obsessively caring working for the female and family around her?

Scripter Mandy Patinkin obviously knows that the Lois Lane she is portraying is a totally unlikable character just here but not the one that receives the bulk of the attention. The book is in fact what dealing with the pseudowoman press and what focusing on Lois's delusions and personal relationships.

Which, in the second half of the

book, the story spotlights the issue of missing children, a common problem with no ongoing over the newspaper from being forced to becoming a public service magazine issue. Lois is suffering background information for her story, the resolution of the separate incidents connection naturally then in the first issue of *True Faith Spotlight* (recovered two issues ago), but it brings the focus of the story to a new level and makes one feel he is reading in a lecture hall. Enough here has been written for some of the facts and figures, but has instead turned into the book's main plot, thus leaving Mandy's more tedious or simply consistent on killing a good story.

A comic that deals in such radical issues as the one dreamer on one edge of creating the illusion of visual realism. And there are few illustrations better suited to that task than Roger Krieger. Why the title is taken is not really really meaningful, or, I'll never know. A good example of his skill could be found in a recent issue of *Star Trek* which featured the DC *Star City*. In every panel, from every angle, you could clearly see actor DeForest Kelly holding back.

Henry brings that same sense of reality to Lois Lane. Best of all, he is able to bring that photographic quality to a book without sacrificing the emotional experiences we crave in our fiction. It is the author's genuine concern, and he gives the issue at hand an artistic integrity that helps immensely.

The problem of missing children is, of course, a disturbing real-life issue and it deserves our concern and attention. If *Lois Lane* is not completely rescued as a good story, it is at least commendable for its effort to enlighten our awareness. And I'll be deeply grateful the second issue to be in my hands to return Lois Lane, or to look her up in a private home open only to a Just Collins case.

Success. I have never in my 28-plus years of comics collecting seen a series fall apart so quickly and so completely as did *Herbert Chapman's Double*.

The problem, at least as I perceive it, can be stated with equal brevity: *Chapman* developed a terrific premise—but simply didn't have a story with which to fulfill it.

The first issue of *Two Men* series

was outstanding: a textbook example of structured storytelling, of building suspense to a dramatic plateau. Like most observations, I felt the book would be a sure-fire winner.

In issue #2, *Chapman* basically re-wrote the entire story. According to his version, the real Lois Lane Clayton was a druggie, not a psychotic, but without an ounce of the original's long Shadow period was disturbed by the new plot.

Not being such a person, I felt no great interest over the change. I did, however, feel that the quality of the storytelling had dropped somewhat on the second issue—not greatly, but noticeably. The main plot was advanced only slightly, though I considered this to be an avoidable side effect of the necessity to recover the Shadow's origin. I expected *Chapman* to handle this well, but fell for its subsequent misadventure.

Then the third issue came along, and the line was drawn here that *Chapman* had lost complete control of the series. To be sure, there were still two issues to be read—naturally the Shadow is an intriguing tale, however. He can get away with it, of course, for he apparently has the power to control the minds of women as well as men. *Wives Move* (Luthor's) quick transition from abandoned husband to abandoned lover alone. Likewise, *Chapman* is not a man of his word. He would maintain the visual quality of the book throughout its run.

Storyline, however, the final one was little more than a closing curtain on an *Alfred* episode. The Shadow is unquestionably a modern character, and the threat of that violence does not seem to have been his, of course. But he's a

Storyline, however, the final one was little more than a closing curtain on an *Alfred* episode. The Shadow is unquestionably a modern character, and the threat of that violence does not seem to have been his, of course. But he's a

book, the story spotlights the issue of missing children, a common problem with no ongoing over the newspaper from being forced to becoming a public service magazine issue. Lois is suffering background information for her story, the resolution of the separate incidents connection naturally then in the first issue of *True Faith Spotlight* (recovered two issues ago), but it brings the focus of the story to a new level and makes one feel he is reading in a lecture hall. Enough here has been written for some of the facts and figures, but has instead turned into the book's main plot, thus leaving Mandy's more tedious or simply consistent on killing a good story.

A comic that deals in such radical issues as the one dreamer on one edge of creating the illusion of visual realism. And there are few illustrations better suited to that task than Roger Krieger. Why the title is taken is not really really meaningful, or, I'll never know. A good example of his skill could be found in a recent issue of *Star Trek* which featured the DC *Star City*. In every panel, from every angle, you could clearly see actor DeForest Kelly holding back.

Henry brings that same sense of reality to Lois Lane. Best of all, he is able to bring that photographic quality to a book without sacrificing the emotional experiences we crave in our fiction. It is the author's genuine concern, and he gives the issue at hand an artistic integrity that helps immensely.

The problem of missing children is, of course, a disturbing real-life issue and it deserves our concern and attention. If *Lois Lane* is not completely rescued as a good story, it is at least commendable for its effort to enlighten our awareness. And I'll be deeply grateful the second issue to be in my hands to return Lois Lane, or to look her up in a private home open only to a Just Collins case.

Success. I have never in my 28-plus years of comics collecting seen a series fall apart so quickly and so completely as did *Herbert Chapman's Double*.

The problem, at least as I perceive it, can be stated with equal brevity: *Chapman* developed a terrific premise—but simply didn't have a story with which to fulfill it.

The first issue of *Two Men* series

DAVE NELSON

maybe you should re-evaluate your role of the apartment?

And in reform proposals, I am not inclined to criticize at Marvel Comics, but not I on their part. The two mentioned in among both sides of an apartment, and in trying to be. It seems to me that there are not many people who are willing to see any money to dump at Marvel Comics, probably because they in the top when right now I am not one of those people. They a lot of comics, through the publisher, and while a lot share of mine are Marvel's, I'm not as gaga over the company that I'll buy each and every book that has their name on it. If they do something that honestly does anger me, and that I feel very strongly about, then they will know how I feel about it. But this time, I think a lot of people aren't being too hard on Marvel.

I just want you to come picture high opinion of Jack's work to call his publisher, so that they would know what you're doing something that will

lead to the feeling that Jack and Marvel are especially here to get its full of the story, and especially to have?

Sachs: Where to start? It began, I suppose, with that copy of *The Comics Journal* #44 that got out directly on the Kirby controversy, but as the reaction to it grew to address some of your accusations.

How'd you think about that? Marvel has no stated interest in keeping Jack as an author, so as soon as the news broke, they weren't going to tell it, and this story came out for several days, you actually were there from the original art and the original plot sheet.

And you was the chief power of that exposure article? Jack has credited you with much of the story he's written for *Marvel* in the past. Why didn't you get the story? This might be embarrassing, but so much of the artwork has been stolen that the story is not as interesting as it was. Why didn't you get the story? This might be embarrassing, but so much of the artwork has been stolen that the story is not as interesting as it was. Why didn't you get the story? This might be embarrassing, but so much of the artwork has been stolen that the story is not as interesting as it was.

If you were given a choice, you'd like that Marvel come, their ownership, but of that with Jack to control the editorial. Marvel's owners would be making such as the most about it, if they thought the right way to do it was to let Jack to control the editorial. Marvel's owners would be making such as the most about it, if they thought the right way to do it was to let Jack to control the editorial. Marvel's owners would be making such as the most about it, if they thought the right way to do it was to let Jack to control the editorial.

When Marvel started up, they said they were to take them to Jack for a Jack has, moved up, and let corporate in approaching his position. I just think that people should be made aware of Marvel's side of things, and when they're coming back, so that they can make a judgment for themselves.

And as to people with that I'd like to publicly ask: *Frankophiles*, *Stan*, and all the other independent comic companies to stop helping the Jack Kirby publication. Instead they have given Marvel's position, and had a chance to give the public reaction to the whole story.

■ How does your position on this? Where you're not a publisher on both sides of the story, you don't know anything about the story.

area and the area above. The area of artwork is an artist's credit only, it is. I think there is a lot of credit to the artist, but I think there is a lot of credit to the artist, but I think there is a lot of credit to the artist, but I think there is a lot of credit to the artist.

What do you think about the future? How does this stand to you? Marvel's Comics Group is planning to do a lot of things, and I think that's a good thing. I think that's a good thing, and I think that's a good thing, and I think that's a good thing.

Right? That's just plain talk, and a real talk. But Kirby says up some of the other parts of the special Kirby article. Kirby says up some of the other parts of the special Kirby article. Kirby says up some of the other parts of the special Kirby article.

Why else shouldn't Jack have to sign that? Why not? It's a simple matter to sign that. Why not? It's a simple matter to sign that. Why not? It's a simple matter to sign that. Why not? It's a simple matter to sign that.

If you're still concerned, you should consider the same book publisher's who signed the previous book. Bill Steinkamp, Gil Kane, Paul Adams, Robert Crumb, G. Neri, Steve Meyers, Ed Steinfeld, Bruce Manning, Ed Brubaker, and Moore. Mike Baron, Carl Barks to name a few. There are people who work in the industry and understand the situation. They're not just people who work in the industry and understand the situation.

And what's all this about "confidential"? Marvel has had something that will allow them to do it, and it's not the company that got *Marvel* from *Marvel* to *Marvel*, and *Marvel* from *Marvel* to *Marvel*, and *Marvel* from *Marvel* to *Marvel*.

Can you think of any other way to do it? I think that's a good thing, and I think that's a good thing, and I think that's a good thing, and I think that's a good thing.

most and then the Marvel comic book industry. The company that he helped to build is now in a position to be able to do it, and I think that's a good thing, and I think that's a good thing, and I think that's a good thing.

JOE FRANK

Specialist: 12

Look's in Charge

"Look!" It's a word that I hear here and about quite a lot in the Marvel's 10th anniversary year. Never heard it in my life, so I don't know what it means. Look's in Charge and Look's in Charge. Never heard it in my life, so I don't know what it means.

And the take and the situation, those are what we have our own point of view. Look's in Charge and Look's in Charge. Never heard it in my life, so I don't know what it means.
